

# PROJECT PLAN

Set-up and showcase of e-commerce System

Naurin Jamil  
Yarovoy Dmitri

# System Overview

- Consider having set-up an e-commerce system, e.g an online shop
- Model the business processes and other work flow designs of relevant use-cases , using a modeling tool, e.g. ARIS
- Provide feature extension through implementation ( export and publish of modeling data online)

# Team Roles

- Team of two members : Naurin and Dima
- Both hold equal responsibility for design and implementation

# Status Update

- Use–Cases in ASTAH : Completed
- Models in ARIS :
  - Business processes : Completed
  - Organizational Charts : Completed
  - IT Infrastructure : Completed
  - Data Models : Completed
- Export of Models into xml : Completed
- Conversion of xml format into rdf : On-going

# Future Plan

- Final system submission : August End
- Set-up , demonstration and poster submission :  
August end – September-mid
