Mohamadhassan Khodashahi

- Sentiment analysis aims to mining the text in the form of negative, positive or neutral.
- Nowadays business through ecommerce has become so popular.
- Most of the algorithms and researches for analysis text are for English language and unusable for other languages.

So our Idea :

Using sentiment analysis for Persian language, that can be so helpful for Enterprise purposes.

- ✓ Analysis Persian text, comments, user overviews... to find
 - The most popular product's future for a company
 - The most famous film for a director
 - The worse future for a product to avoid in feuture.
