Exploiting Data from Government Data

- Technical System Documentation
  - Code
    - Each class
    - Test
    - Self-explained / Comment / Java doc
  - Architectural Components
    - Diagram
    - Comparison of the different portals
    - Heterogeneity of data structures and languages

- End-user System Documentation
  - User manual
    - How the system works
    - Environments setup instruction step by step
    - How to download / query data on specific domain
    - How to import from data in different forms
    - How to export to EIS (Oracle Database)
    - How to select attributes for comparison and visualization
